

Steel Powder Coating Walk Through Scaffold System for Surface Treatment

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04

Product Specification

- Material: Steel
- Stability: High
- Surface Treatment: Powder Coating
- Safety: High
- Easy Installation: Yes
- Load Capacity: High
- Easy Dismantling: Yes
- Size: Customized
- Highlight: **Main Frame Scaffolding,
Standard Scaffolding Frame**

Product Description

Product Description:

Frame System Scaffolding is an American frame system structuring solution that provides unparalleled stability and high quality for the construction industry. It is a lightweight, easy-to-dismantle, reusable, and customizable scaffolding frame system that is designed to offer the highest levels of safety and reliability. With its superior strength and strength-to-weight ratio, Frame System Scaffolding allows for faster and more efficient construction operations. The system is designed with a focus on modularity and flexibility, allowing for custom sizing and configuration to fit any project's needs. Thanks to its strong, corrosion-resistant aluminum alloy construction, Frame System Scaffolding is capable of withstanding the toughest construction conditions and providing a safe and reliable environment for workers.

Features:

Frame System Scaffolding -- a walk-through-scaffold-system, with-h frames providing stability and safety.

Material - Made of steel for durability.

Easy Dismantling - Can be easily disassembled for transport and storage.

Safety - High level of safety, with features such as guardrails and toe boards.

Color - Available in both steel and painted colors.

Technical Parameters:

Attribute	Description
Material	Steel
Easy Dismantling	Yes
Cost-effectiveness	Yes
Durability	High
Size	Customized
Weight	Lightweight
Flexibility	High
Load Capacity	High
Color	Steel, Painted Color
Surface Treatment	Powder Coating
Product Name	Frame System Scaffolding
Product Type	H Frame, Scaffold Mobile Frame

Applications:

Bythai BT04 Steel Frame System Scaffolding -- Durable, Stable and High Quality

Bythai BT04 Steel Frame System Scaffolding is a high quality, durable and stable scaffolding frame system. Made from steel with a painted color surface, this scaffolding frame system is one of the most reliable and long lasting scaffolding systems on the market. This system is perfect for any construction or renovation project, providing a sturdy and secure scaffolding system that is both easy to use and safe for workers. The powder coating ensures high durability and the steel material ensures high stability.

Bythai is a leading supplier of frame scaffolding systems. Our BT04 Steel Frame System Scaffolding is designed to provide the maximum amount of safety and stability for your construction or renovation project. We guarantee the highest quality of our product, providing you with a safe and secure scaffolding system that you can trust. With our steel scaffolding frame system, you can rest assured that you are getting a reliable and sturdy system.

If you are looking for a reliable and durable frame scaffolding system, then Bythai BT04 Steel Frame System Scaffolding is the perfect choice for you. This system is designed to provide the highest level of safety and quality, ensuring that your project is completed safely and efficiently. With its high durability and high stability, this system is sure to provide you with the best scaffolding system on the market.

Customization:

Bythai BT04 Frame System Scaffolding is a high-durability product of steel construction with powder coating surface treatment. It features

an easy-to-install H-frame and walk-through scaffold design that can be customized according to size. China is the place of origin.

Support and Services:

Frame System Scaffolding Technical Support and Service

We provide technical support and services for Frame System Scaffolding products. We offer 24/7 customer service and technical support to ensure that all of your Frame System Scaffolding needs are met.

We are available to answer any questions you may have about the product, as well as troubleshoot any issues you may be experiencing.

We can also provide installation assistance and can provide additional information about our products and services.

If you need any additional help or have any questions, please don't hesitate to contact us. We look forward to helping you with your Frame System Scaffolding needs.

Packing and Shipping:

Packaging and Shipping

The Frame System Scaffolding will be securely packaged to prevent any damage during shipping.

We will use a reputable courier service to ensure the product arrives safely.

The product will be shipped within 2 business days of receiving payment.

FAQ:

Q: What is Frame System Scaffolding?

A: Frame System Scaffolding is a steel scaffolding system manufactured by Bythai (Model: BT04). It is designed for construction purposes, providing an easy to install, safe and reliable scaffolding solution.

Q: Where is Frame System Scaffolding made?

A: Frame System Scaffolding is made in China by Bythai.

Q: What are the components of Frame System Scaffolding?

A: The components of Frame System Scaffolding include frames, guardrails, ladders, jacks, and other accessories.

Q: What are the benefits of Frame System Scaffolding?

A: Frame System Scaffolding is designed for easy installation, is strong and durable, and provides a safe and secure scaffolding solution.

Q: What is the model number of Frame System Scaffolding?

A: Frame System Scaffolding is manufactured by Bythai and its model number is BT04.
