Product Description

Galvanized Scaffolding Coupler Essential Construction Support Scaffolding Pipe Coupler

Product Description:

Scaffolding Coupler: The Ultimate Scaffold and Structure Connector Tool

The Scaffolding Coupler is a high quality, manual scaffold connection tool designed to provide a strong and reliable connection between scaffolds and structures. Made from durable steel and coated with a galvanized surface treatment, this coupler is built to withstand even the toughest job sites.

Key Features

High Strength: The Scaffolding Coupler is designed to provide a secure and sturdy connection, ensuring the safety and stability of any scaffold structure.

Galvanized Surface Treatment: This coupler is coated with a layer of zinc to prevent corrosion and rust, making it suitable for use in both indoor and outdoor construction projects.

British-style Scaffold Connectors: The Scaffolding Coupler features a classic British-style design, which is known for its reliability and ease of use. It is compatible with most standard scaffolding systems and can be easily installed and removed.

Silver Color: The coupler's sleek silver color not only adds to its aesthetic appeal, but also makes it highly visible on the construction site, ensuring the safety of workers.

Minimum Order Quantity (MOQ)

The MOQ for the Scaffolding Coupler is 1000 pieces. This ensures that you have enough couplers to complete your project and also allows for future replacements or additions.

Application

The Scaffolding Coupler is suitable for a wide range of construction projects, including building construction, bridge construction, and maintenance work. It is an essential tool for any scaffolding project, providing a strong and secure connection between the scaffold and the structure.

Conclusion

In summary, the Scaffolding Coupler is a reliable and high-quality manual scaffold connection tool that is essential for any construction project. Its galvanized surface treatment, high strength, and British-style design make it a must-have for any scaffolding system. With a minimum order quantity of 1000 pieces, you can ensure that your project is completed safely and efficiently.

Additional Features	High-Quality British Couplers, Manual Scaffold Connection Tools

Applications:

Introduction to Scaffolding Coupler

Scaffolding Coupler, also known as Universal Scaffold Clamping Tools, is a manual scaffold connection tool used in construction sites. It is designed to provide a secure and stable connection between scaffolding tubes, ensuring the safety of workers and the stability of the structure.
Made with high-quality materials and certified by SGS, our Scaffolding Coupler is a reliable and trusted product for all your construction needs. It is suitable for both small and large-scale projects and is widely used in various industries such as building construction, bridge construction, and shipbuilding.
Product Attributes

Brand Name: Scaffolding Coupler
Model Number: BM201
Place of Origin: China Tianjin
Certification: SGS
Price: $4.5-8.5
Packaging Details: In bundles
Delivery Time: 15-25 days
Payment Terms: TT/TC
Standard: EN74-1
Surface Treatment: Galvanized
MOQ: 1000 pieces
Application and Scenarios

Our Scaffolding Coupler is widely used in different construction scenarios, providing a safe and stable solution for various scaffolding needs. Some common applications of our product include:
Building Construction: Our scaffolding coupler is an essential tool in building construction, providing a secure connection between scaffolding tubes for workers to access different levels of the building.
Bridge Construction: The stability and durability of our scaffolding coupler make it a popular choice for bridge construction, where safety is of utmost importance.
Shipbuilding: Our product is also widely used in shipbuilding, providing a stable platform for workers to access different parts of the ship during construction.
Our Scaffolding Coupler is suitable for both indoor and outdoor use, making it a versatile tool for all your construction needs. It can withstand harsh weather conditions and is designed to provide a safe and stable connection in any environment.
Why Choose Our Scaffolding Coupler?

There are several reasons why our Scaffolding Coupler is the top choice for many construction professionals:
Galvanized: Our coupler is galvanized, making it resistant to rust and corrosion. This ensures its durability and longevity, even in harsh environments.
High Quality: Made with high-quality materials, our scaffolding coupler is strong and durable, providing a secure connection for scaffolding tubes.
Easy to Use: Our coupler is designed for easy installation and removal, making it a convenient tool for construction workers.
Safe and Stable: With its strong grip and stable connection, our scaffolding coupler ensures the safety of workers and the stability of the structure.
So, whether you are a construction company or an individual contractor, our Scaffolding Coupler is the perfect choice for all your scaffolding needs. Contact us now to place your order and experience the quality and reliability of our product.

Customization:

Customized Service for Scaffolding Coupler

Brand Name: Scaffolding Coupler
Model Number: BM201
Place of Origin: China Tianjin
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 15-25 days
Payment Terms: TT/TC
Color: Silver
Name: Scaffolding Coupler

Feature: High Strength
Package: Container
At Scaffolding Coupler, we understand that every project is unique and may require specific solutions. That's why we offer a comprehensive Customized Service for our customers.
Our Scaffold Clamping System, BS EN 74 Scaffold Accessories, and High-Quality Japanese Scaffold Accessories can all be tailored to meet your specific needs and requirements.

With our Customized Service, you can expect:

Personalized consultations to understand your project and its unique requirements

Expert advice on the best products and solutions for your project

Customized design and manufacturing of our products to fit your specifications

High-quality materials and strict quality control to ensure durability and safety

Efficient delivery and packaging in bundles or containers

Flexible payment terms such as TT/TC

Our Scaffolding Coupler is known for its high strength and reliability, making it an essential component for any construction project. With our Customized Service, you can be assured that our products will meet your specific requirements and contribute to the success of your project.

Choose Scaffolding Coupler for your next project, and let our Customized Service provide you with the perfect solution.

Packing and Shipping:

Packaging and Shipping for Scaffolding Coupler

Our Scaffolding Coupler is carefully packaged to ensure safe and secure delivery to our customers. Each coupler is individually wrapped in plastic to protect it from scratches and damage during transportation.

Multiple couplers are then packed into a sturdy and durable cardboard box. The box is labeled with the product name, quantity, and any special handling instructions to ensure proper handling during shipping.

To further protect the couplers during shipping, the box is filled with cushioning materials such as bubble wrap or packing peanuts. This helps to prevent any movement or damage to the couplers during transit.

Our packaging team pays special attention to the weight and size of the package to ensure cost-effective shipping for our customers. We also comply with all shipping regulations and requirements to make sure our products reach their destination safely and on time.

For shipping, we use reputable and reliable carriers to ensure prompt and efficient delivery. Customers have the option to choose their preferred shipping method and can track their package using the provided tracking number.

We take great pride in our packaging and shipping process to provide our customers with a hassle-free and satisfactory experience. Trust us to deliver your Scaffolding Coupler to you in perfect condition, every time.
