Steel Scaffolding Coupler with EN74-1 Standard for Heavy-Duty Construction

Our Product Introduction

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Feature: High Strength
- Surface Treatment: Galvanized
- Name: Scaffolding Coupler
- MOQ: 1000
- Material: Steel
- Package: Container
- Standard: EN74-1
- Application: Construction

Product Description

Product Description:

Scaffolding Coupler - Product Overview

The Scaffolding Coupler is an essential component in the construction industry, used to connect two scaffold tubes together securely. It is designed to meet the EN74-1 standard, ensuring safety and reliability in every use. With a MOQ of 1000, it is a cost-effective solution for construction projects of any scale.
Our Scaffolding Coupler is made with high-quality materials and manufactured using advanced technology, making it a reliable and durable product. It is designed to withstand heavy loads and harsh working conditions, ensuring a long service life.
The coupler is designed to be easy to install, saving time and effort for construction workers. It is compatible with BS1139 standard couplings, also known as British scaffold tube clamps, making it a versatile and convenient choice for any construction project.
The Scaffolding Coupler is silver in color, giving it a sleek and professional appearance. This makes it suitable for use in a variety of settings, including commercial, industrial, and residential construction projects.
Each coupler is carefully packaged in containers, ensuring safe transportation and storage. This also makes it easy for construction workers to access and use the product on-site.
In summary, the Scaffolding Coupler is a high-quality, durable, and easy-to-install product that meets the EN74-1 standard. With its compatibility with BS1139 standard couplings and attractive silver color, it is a versatile and reliable choice for any construction project. Don't hesitate to contact us for your scaffolding connector needs.

Features:

Product Name: Scaffolding Coupler
Name: Scaffolding Coupler
Color: Silver
Application: Construction
Material: Steel
MOQ: 1000
Steel Structure Scaffold Connectors
British Coupler Manufacturers
Universal Scaffold Clamping Tools

Technical Parameters:

Parameter	Value
Package	Container
Standard	EN74-1
Name	Scaffolding Coupler
Surface Treatment	Galvanized
MOQ	1000
Color	Silver
Material	Steel
Feature	High Strength
Application	Construction
Key Words	scaffolding coupler, British-style Scaffold Connectors, JIS Standard Couplings

Applications:

Scaffolding Coupler - The Best Choice for Your Construction Needs

Scaffolding Coupler is a high-quality and reliable product designed to meet the needs of the construction industry. Made with Japanese steel, this product is durable, strong, and able to withstand heavy loads. Its innovative design makes it the perfect choice for all your scaffolding needs.
Product Attributes

Brand Name: Scaffolding Coupler
Model Number: BM201
Place of Origin: China Tianjin
Certification: SGS
Price: $4.5-8.5
Packaging Details: In bundles
Delivery Time: 15-25 days
Payment Terms: TT/TC
Material: Steel
Package: Container

Name: Scaffolding Coupler

Standard: EN74-1

Surface Treatment: Galvanized

Application and Use

Scaffolding Coupler is the perfect solution for all your scaffolding needs. It is widely used in the construction industry for building, bridge, and other infrastructure projects. This product is designed to connect scaffolding pipes and beams, providing a strong and stable structure to support workers and materials during construction.
With its high-quality Japanese steel construction, Scaffolding Coupler is able to withstand heavy loads and harsh weather conditions, making it the ideal choice for both indoor and outdoor use. Its galvanized surface treatment also ensures resistance to rust and corrosion, further increasing its durability and longevity.
The product's standard size and easy installation make it suitable for various scaffolding systems. It is compatible with all types of scaffolding pipes and beams, making it a versatile and valuable addition to any construction project.
Scene and Scenario

Imagine you are a construction contractor working on a new building project. You need a reliable scaffolding system that can withstand heavy loads and provide a safe working environment for your workers. This is where Scaffolding Coupler comes in.
You order a large quantity of Scaffolding Couplers, which are delivered to your construction site within 15-25 days. The couplers are carefully packaged in bundles and are easy to transport and handle. With the help of your team, you start assembling the scaffolding system using the couplers to connect the pipes and beams.
The scaffolding couplers fit perfectly, and their galvanized surface treatment protects them from rust and corrosion, ensuring the safety and stability of your scaffolding structure. Your workers can now work confidently, knowing that they are using a high-quality and reliable scaffolding system.
As the project progresses, you are impressed with the durability and strength of the Scaffolding Couplers. They have not only made your construction process smoother and more efficient, but they have also saved you time and money. Your client is also satisfied with the progress and safety of the project, thanks to the use of Scaffolding Coupler.
With Scaffolding Coupler, you can confidently take on any construction project, knowing that you have the best scaffolding system in place to support you and your team. Order your Scaffolding Couplers today and experience the difference in your construction process.

Customization:

Scaffolding Coupler - Customized Service

Brand Name: Scaffolding Coupler
