

High Load Capacity Steel Frame System Scaffolding for Spray Plastic and Construction

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM205
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Material: Q235
- Shipping Origin: China
- Color: Steel/Spray Plastic
- Load Capacity: High
- Arrival Time: 10-15
- Size: Customized
- Highlight: **Q235 Steel Frame System Scaffolding, Construction Frame System Scaffolding, SGS Frame Scaffolding System**

Product Description

Product Description:

Product Overview: Frame System Scaffolding

The Frame System Scaffolding is a high-quality, durable and customizable scaffolding solution designed for efficient and safe construction projects. This product is specifically designed to meet the demands of American construction standards, making it the ideal choice for any construction project in the United States.

Arrival Time

The Frame System Scaffolding has an arrival time of 10-15 days, providing quick delivery to meet the tight deadlines of construction projects. This makes it a reliable and efficient choice for any project where time is of the essence.

Shipping Origin

Material

The Frame System Scaffolding is made from high-quality Q235 steel, a commonly used material in construction due to its strength and durability. This ensures that our scaffolding is able to withstand harsh weather conditions and heavy use, providing a reliable and long-lasting solution for your construction needs.

American Frame

The Frame System Scaffolding is a portal frame scaffold, a type of scaffolding commonly used in American construction projects. This makes it a perfect fit for projects in the United States, ensuring compliance with local construction standards and regulations.

Scaffold Frame

The Frame System Scaffolding is a scaffold frame, meaning it consists of a series of interconnected frames that can be easily assembled and disassembled. This allows for quick and efficient assembly, saving time and labor costs on construction sites.

Quick Assembly

The Frame System Scaffolding is designed for quick assembly, allowing for a smooth and efficient construction process. With its simple and secure locking system, our scaffolding can be easily assembled by a small team of workers without the need for specialized tools or equipment.

Overall, the Frame System Scaffolding is a reliable, durable, and customizable solution for all your construction needs. With its high load capacity, quick assembly, and compliance with American standards, this scaffolding is the perfect choice for any construction project. Contact us today to learn more and get a quote for your project.

Technical Parameters:

Attribute	Value
Product Name	Scaffold Portal Frame System
Load Capacity	High

Material	Q235
Size	Customized
Arrival Time	10-15 days
Color	Steel/Spray Plastic
Shipping Origin	China
Product Type	Scaffold Mobile Frame
Shoring System Type	Portal Frame Shoring System

Applications:

Frame System Scaffolding - Your Ultimate Solution for Construction and Maintenance

Brand Name: Bythai

Model Number: BM205

Place of Origin: China

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 10-15

Payment Terms: TT/TC

Size: Customized

Material: Q235

Color: Steel/Spray Plastic

Shipping origin: China

Load Capacity: High

Frame System Scaffolding is a versatile and essential product for construction and maintenance work. It is widely used in various building projects, both large and small, all over the world. Bythai's BM205 Frame System Scaffolding, produced in China and certified by SGS, is a reliable and cost-effective solution for all your scaffolding needs.

Application Scenarios:

Construction Sites: Frame scaffolding is commonly used in the construction of buildings, bridges, and other structures. Its versatility makes it suitable for different types of projects, whether it is a high-rise building or a small residential house.

Maintenance Work: The stability and durability of frame scaffolding make it a preferred choice for maintenance work. Whether it is painting, cleaning, or repairing, frame scaffolding provides a safe and stable platform for workers to perform their tasks.

Renovation Projects: When renovating a building, frame scaffolding is often used to support workers and materials. Its easy installation and customization options make it an ideal choice for complex renovation projects.

Product Features:

High Load Capacity: Bythai's BM205 Frame System Scaffolding is made from Q235 steel material, ensuring high load capacity and strength. It can support heavy loads and withstand harsh weather conditions.

Safety: Safety is a top priority in any construction or maintenance work. With frame scaffolding, workers can work at height with confidence, knowing that the scaffolding is stable and secure.

Versatility: Frame scaffolding can be used for various purposes, such as supporting workers, materials, and equipment. It is also suitable for different types of structures, making it a versatile solution for any project.

Customization: Bythai offers customized sizes and designs to meet the specific needs of different projects. This ensures that the scaffolding fits perfectly and provides maximum support.
