

Steel Sheet Galvanised 4m Walk Board Metal Scaffolding Plank Scaffold Board Scaffold Platform

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS,ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 15.5-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping, L/C, T/T

Product Specification

- Material: Steel
- Usage: Scaffolding
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Length: Customized
- Place Of Shipment: China
- Packaging: Container
- Highlight: **Wholesale Scaffolding Plank, Platform Scaffolding Plank, Metal Scaffolding Plank**

Product Description

Product Description:

The Steel Plank Ringlock Scaffolding system is a revolutionary product designed to provide a robust and secure platform for construction and maintenance work. Manufactured with high-grade steel, this steel plank scaffold embodies strength and durability, ensuring the safety of workers while accommodating the demands of various construction environments. Available with different surface treatments such as pre-galvanized, hot dip galvanized, and spray plastic, our steel plank ringlock scaffolding can withstand harsh conditions and resist corrosion, making it a reliable choice for your building needs.

At the core of its design, the steel plank scaffold is crafted from steel, a material renowned for its load-bearing capabilities and resilience. The use of steel not only guarantees a stable work surface but also ensures longevity, so your investment stands the test of time. Steel is a preferred material in the construction industry due to its favorable properties such as resistance to wear, impact, and deformation, which are crucial for the safety and efficiency on any job site.

The usage of the Steel Plank Ringlock Scaffolding is incredibly versatile, catering to a multitude of scaffolding requirements. Whether it is for residential building projects, commercial construction, or industrial maintenance, the adaptability of this scaffolding solution makes it an indispensable tool for workers. The interlocking ringlock system provides a secure connection between the steel planks, forming a continuous and stable work platform that can be easily assembled and disassembled, saving valuable time and labor costs.

When it comes to packaging and shipping, our steel plank ringlock scaffolding is meticulously prepared for safe and secure transit.

Packaged in containers, these steel planks are efficiently stacked and protected to prevent any damage during transportation. This packaging method ensures that the product arrives at your site in pristine condition, ready for immediate use. The choice of container packaging also facilitates the handling of large quantities, making it an economical option for bulk orders.

The place of shipment for our steel plank scaffold is China, a global hub for manufacturing and logistics. By shipping directly from China, we are able to leverage the cost-effectiveness and scalability of production. This strategic location allows us to serve a global clientele with efficiency and speed, ensuring that your order is processed, shipped, and delivered in a timely manner. Moreover, China's advanced manufacturing capabilities enable us to maintain a consistent supply of high-quality steel planks while keeping production costs competitive.

Our steel plank ringlock scaffolding comes with the assurance of quality and compliance with international safety standards. The surfaces of the planks are treated to withstand various environmental factors. The pre-galvanized option provides a layer of protection against rust and corrosion, suitable for indoor and moderate outdoor use. For more demanding conditions, the hot dip galvanized surface offers superior resistance to the elements, making it ideal for long-term outdoor projects. Alternatively, the spray plastic surface treatment adds an extra layer of durability and non-slip properties, enhancing worker safety under various conditions.

In conclusion, the Steel Plank Ringlock Scaffolding is an essential product that combines safety, quality, and functionality. Its steel construction, versatile usage, and various surface treatment options make it suitable for a wide range of scaffolding applications.

Packaged securely and shipped from China, our steel plank scaffold provides an economical and reliable solution for your construction needs. Invest in our steel plank ringlock scaffolding to ensure the safety of your workers and the success of your projects.

Technical Parameters:

Attribute	Details
Packaging	Container
Surface	Pre-galvanized/Hot Dip Galvanized/Spray Plastic
Place of Shipment	China
Usage	Scaffolding
Material	Steel
Length	Customized
