

## Customized Aluminum Ringlock Standard Ledger Diagonal Brace Scaffolding Parts

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS
- Model Number: BS204
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: TT/TC

### Product Specification

- Features: High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional
- Material: Aluminum
- Application: Scaffolding System
- Size: Various Sizes Available
- Components: Aluminum Ringlock Standard, Aluminum Ringlock Standard
- Standard: EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
- Packing: Container
- Oem: Available

## Product Description

### Product Description:

Product Overview: Aluminum Ringlock System

The Aluminum Ringlock System is a highly versatile and durable product designed for use in construction, maintenance, and repair projects. Made from high strength aluminum material, this locking system is not only lightweight and flexible, but also cost-effective and environmentally friendly.

Features

**High Strength:** The use of high strength aluminum makes the ringlock system strong and reliable, able to withstand heavy loads and harsh working conditions.

**Easy To Assemble:** The ringlock system can be easily and quickly assembled without the need for specialized tools or equipment.

**Versatile:** This product can be used for a variety of applications, making it a versatile and adaptable choice for different projects.

**Durable:** With its corrosion resistant properties, the aluminum ringlock system is able to withstand exposure to harsh weather conditions and chemical substances, ensuring long-term durability.

**Lightweight:** The use of lightweight aluminum material makes the ringlock system easy to transport and maneuver, reducing labor and transportation costs.

**Cost-effective:** The locking system price is affordable and the durable nature of the product makes it a cost-effective choice for construction projects.

**Flexible:** The ringlock system can be easily adjusted and configured to fit different project requirements, providing flexibility and adaptability on the job site.

**Safe:** With its stable and sturdy structure, the aluminum ringlock system ensures the safety of workers on the job site.

**Stable:** The locking scaffolding and its accessories provide a stable and secure platform for workers to perform their tasks.

**Efficient:** The interchangeable components of the ringlock system allow for quick and efficient assembly, saving time and labor costs.

**Environmentally Friendly:** Made from aluminum, a sustainable and recyclable material, the ringlock system is an environmentally friendly choice.

**Interchangeable:** The components of the ringlock system are interchangeable, allowing for easy replacement and maintenance.

**Adjustable:** The ringlock system can be adjusted to different heights and angles, making it suitable for various construction needs.

**Multi-functional:** Whether used for construction, maintenance, or repair projects, the aluminum ringlock system is a multi-functional solution.

Material

The Aluminum Ringlock System is made from high strength aluminum material, providing durability and reliability for various construction needs.

Usage

The Aluminum Ringlock System is suitable for use in construction, maintenance, and repair projects, offering a versatile and efficient solution for various applications.

Components

The Aluminum Ringlock System consists of Aluminum Ringlock Standards and Aluminum Ringlock Ledgers, providing a stable and secure platform for workers to perform their tasks.

Packing

The Aluminum Ringlock System is packed in containers, making it easy to transport and store.

Technical Parameters:

<b>Product Name</b>	Aluminum Ringlock System
<b>Size</b>	Various Sizes Available
<b>Type</b>	Ringlock
<b>Packing</b>	Container
<b>Usage</b>	Construction, Maintenance, Repair
<b>Standard</b>	EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
<b>Application</b>	Scaffolding System
<b>Components</b>	Aluminum Ringlock Standard, Aluminum Ringlock Standard
<b>Material</b>	Aluminum
<b>OEM</b>	Available
<b>Features</b>	High Strength Easy To Assemble Versatile Durable Corrosion Resistant Lightweight Cost-effective Flexible Safe Stable Efficient Environmentally Friendly Interchangeable Adjustable Multi-functional
<b>Key Features</b>	Locking scaffolding accessories, High-strength locking, Locking scaffolding accessories, Cost-effective design, Safe and stable structure

### Applications:

Aluminum Ringlock System for Efficient and Safe Construction

Product Description:

The Aluminum Ringlock System, manufactured by bythai, is a high-quality scaffolding system designed for construction, maintenance, and repair projects. Made from durable and lightweight aluminum, it is weather-resistant and can be used in various environments. The system is certified by SGS and complies with international standards such as EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, and BS1139.

Product Attributes:

Brand Name: bythai

Model Number: BS204

Place of Origin: China

Certification: SGS

Minimum Order Quantity: 100

Price Range: \$4.5-8.5 per piece

Packaging Details: Containers

Delivery Time: 10-15 days

Payment Terms: TT/TC

Material: High-quality aluminum

Features: High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional

Application: Scaffolding System

Standard: EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139

Usage: Construction, Maintenance, Repair

Product Application:

The Aluminum Ringlock System is a versatile and efficient solution for various construction projects. Its weather-resistant locking system makes it suitable for both indoor and outdoor use. The system can be easily assembled and disassembled, making it ideal for projects that require frequent changes in height and position. It is commonly used in the following applications:

Building and skyscraper construction

Bridge construction and maintenance

Industrial and commercial maintenance and repair

Power and energy plant construction and maintenance

Shipbuilding and offshore platform construction

Temporary structures for events and exhibitions

Product Features:

1. High Strength: The Aluminum Ringlock System is made from high-quality aluminum that can withstand heavy loads and provide a stable platform for workers.
2. Easy To Assemble: The system is designed for quick and easy assembly, reducing labor costs and increasing efficiency.
3. Versatile: With its interchangeable components, the system can be adapted to different shapes, sizes, and heights, making it suitable for various construction projects.
4. Durable: The system is made from corrosion-resistant aluminum, ensuring its long-term durability and safety.
5. Lightweight: The use of lightweight aluminum makes the system easy to transport and maneuver, reducing the risk of injuries and accidents.
6. Cost-effective: The Aluminum Ringlock System is a cost-effective solution compared to traditional scaffolding systems, reducing construction time and labor costs.
7. Flexible: The system can be adjusted and reconfigured to accommodate changes in project requirements, making it a flexible option for construction projects.
8. Safe: The system is designed to provide a safe working environment for workers, reducing the risk of accidents and injuries.
9. Stable: The interlocking design of the system provides a stable and secure platform for workers to perform their tasks.
10. Efficient: The Aluminum Ringlock System allows for quick and efficient installation and dismantling, saving time and increasing project productivity.
11. Environmentally Friendly: Made from recyclable materials, the system is a sustainable and environmentally friendly choice for construction projects.
12. Interchangeable: The system's components are interchangeable, allowing for easy replacement and reconfiguration to suit project needs.
13. Adjustable: The system can be adjusted to different heights, making it suitable for projects that require working at various levels.
14. Multi-functional: The Aluminum Ringlock System can be used for various applications, making it a versatile and multi-functional solution for construction projects.

Conclusion:

The Aluminum Ringlock System by bythai is a high-quality and efficient scaffolding solution for construction, maintenance, and repair projects. With its weather-resistant locking system, versatile features, and various applications, it is a reliable and cost-effective choice for any construction project. Experience the benefits of the Aluminum Ringlock System and ensure safety and efficiency on your next project.

## Customization:

bythai Aluminum Ringlock System

Model Number: BS204

Brand Name: bythai

Place of Origin: China

Certification: SGS

Minimum Order Quantity: 100

Price Range: \$4.5 - \$8.5

Packaging Details: Container

Delivery Time: 10-15 days

Payment Terms: TT/TC

Application: Scaffolding System

Size: Various Sizes Available

OEM: Available

Type: Ringlock

Features:

Lightweight ringlock system

Flexible locking system

Locking scaffolding accessories

High strength aluminum alloy

Customized design

Interchangeable components

Efficient and cost-effective

Versatile and durable

Safe and stable

Environmentally friendly materials

Various sizes available

## Packing and Shipping:

Packaging and Shipping for Aluminum Ringlock System

The Aluminum Ringlock System is carefully packaged to ensure safe delivery to our customers. Each component is individually wrapped and placed in a sturdy wooden crate. The crates are then stacked and secured on a pallet for easy transportation. The packaging is designed to protect the system from any damage during transportation and storage.

For international shipping, the crates are further reinforced with steel bands and shrink-wrapped. This provides additional protection and stability during long-distance transport. The crates are also marked with product information for easy identification.

We offer various shipping options to meet our customers' needs. These include air freight, sea freight, and land transport. Our team will work with you to determine the most efficient and cost-effective shipping method based on your location and delivery time requirements.

Upon arrival, our customers can expect to receive the Aluminum Ringlock System in excellent condition, ready for immediate use. We take great care in packaging and shipping our products to ensure customer satisfaction.
